**inteligentni** sistemi za vašu kuću

## ● nama

SMART HOME je osnovana na temelju dugogodišnje saradnje partnerskih firmi na području KNX/EIB tehnologije i AUDIO/VIDEO. Uvođenjem KNX standarda u svet kućne automatizacije ulazimo u područje kućnih inteligentih sistema, tzv. »pametnih kuća«. Danas je SMART HOME jedan od poznatijih integratora tih modernih tehnologija. Sa svojim timom stručnjaka smo ostvarili prestižne projekte te uživamo poverenje renomiranih svetskih imena u svetu inteligentnih rešenja GIRA, multiroom sistema REVOX, PHILIPS, PRONTO...

## about US

*Smart Home Company was founded on the basis of long-term cooperation with our partner companies on the fields of KNX/EIB and AUDIO/VIDEO technology. With the introduction of standards on the field of KNX home automation we entered into an area of intelligent system or so-called "Smart house". SMARTHOME is one of well-known integrators of this modern technology. With our team of experts we have made prestigious projects and enjoyed the confidence of renowned names in the world of intelligent solutions GIRA, multi-room system REVOX, PHILIPS PRONTO...*

## inteligentni sistemi

Sistem inteligentnog upravljanja je implementacija EIB/KNX tehnologije u gradnji moderne kuće, koja kao osnovnu namenu ima prvenstveno veliku uštedu energije te sigurnost uz visoki komfor upravljanja. Integracijom svih električnih elemenata, HVAC-a (grejanja, klimatizacije, ventilacije), roletni, žaluzina, uz povezanost video nadzora, interneta, telefonije, multimedije, ostvarujemo izuzetno sigurno i jednostavno upravljanje. Primenom senzora prisustva, protipožarnih i protivpoplavnih senzora, vremenske stанице, objekat samostalno brine o potrošnji energije i sigurnosti.

## intelligent systems

An intelligent control system is an implementation of the EIB/KNX technology in building a modern home, the basic purpose of which is significant energy saving, as well as security that includes high controlling comfort. By integrating all electrical elements, HVAC (heating, ventilation and air conditioning), roller shutters, Venetian blinds, and the connection of video surveillance, Internet, telephony and multimedia, we achieve absolutely safe and simple controlling. With the use of presence, fire and flood sensors, as well as of the time unit, the building independently takes care of energy spending and security.

## **upravljanje** rasvete, grejanja, roletni i žaluzina

U porodičnoj kući ili stanu elektroinstalacija mora pružiti mnogo više od običnih utičica i sijalica, dok su poslovne zgrade posebna priča: tu se na elektroinstalacije priključuje razna automatika za grejanje, hlađenje, ventilaciju, rasvetu, protivpožarni i protivpovlačni uređaji.

Prilikom uvođenja reda među žicama, EIB instalacijski sistem je nezamjenljiv jer svaki upravljački signal putuju jednim kablom što naravno pojednostavljuje i smanjuje troškove izvođenja same instalacije. Osnova sistema je mogućnost neograničenog upravljanja svim elementima te njihova potpuna kontrola u i izvan objekta.

## **light, heating and roller shutter control**

In a family house or an apartment, an electrical installation must provide much more than regular sockets and bulbs, whereas office buildings are quite a different story for they have various heating, cooling, ventilation and light automatic devices, as well as anti-theft and fire devices connected to electrical installations. The EIB installation system is irreplaceable in case you want to organize the wires since all controlling signals go through one cable thus naturally simplifying and reducing construction costs of the installation. The basis of the system is a possibility to limitlessly control all the elements both from inside and outside of the building.

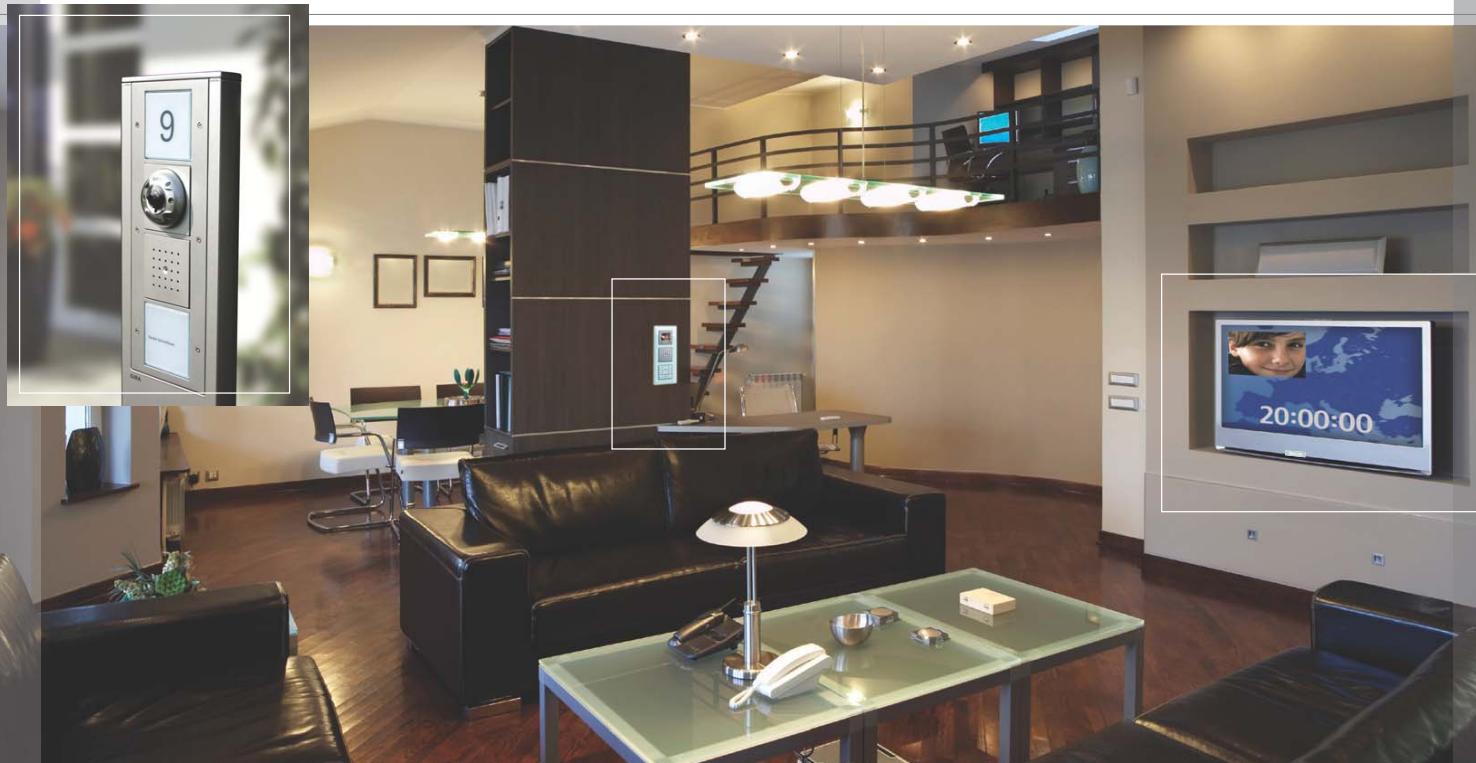

## interfonski sistemi

Jedinstven dizajn GIRA komunikacijskog sistema svojim modularnim konceptom postaje celina zajedno s preostalim prekidačima ili audio konzolama, te se odabirom željenog okvira u potpunosti stapa s vašim enterijerom. Uz integraciju s REVOX multiroom sistemom vaša se komunikacija ostvaruje putem slike na vašem TV ekranu te komunikacijom putem kućnog telefona ili PDA. Kroz kontrolu pristupa čitačima otiska prstiju, kartice ili šifratora vaš je objekat pod potpunom kontrolom.

## door communication system

By its modular concept, a unique design of the GIRA communication system creates a unity with the rest of the switches or audio consoles and completely melts with your interior through the selection of a desired frame. In case of integration with the REVOX multiroom system, your communication is conveyed via a picture on your TV screen, as well as via a home phone or a palm. By controlling the access to a fingerprint reader, a card reader, or an encipherment device, your building is under full control.

## centralno upravljanje

Implementacijom „GIRA Home Servera“ sve funkcije možete upravljati i kada ste izvan svoje kuće ili radnog prostora, pa Vas neprisutnost neće omesti da putem naredbi poslatih izdaleka organizujete dobrodošlicu sebi i svima koje želite ugodno smestiti i iznenaditi.

Interakcija s Vašim objektom daje vam osećaj potpune kontrole te vas informiše o statusu u svakom trenutku.

## central monitoring and controlling

By implementing the GIRA Home Server, you can control all the functions even when you are out of your home or office so your absence will not prevent you from organizing a welcome to you and everybody you want to pleasantly accommodate and surprise via commands sent from a distant place. The interaction with your building gives you a sense of full control and informs you about its status in each moment.

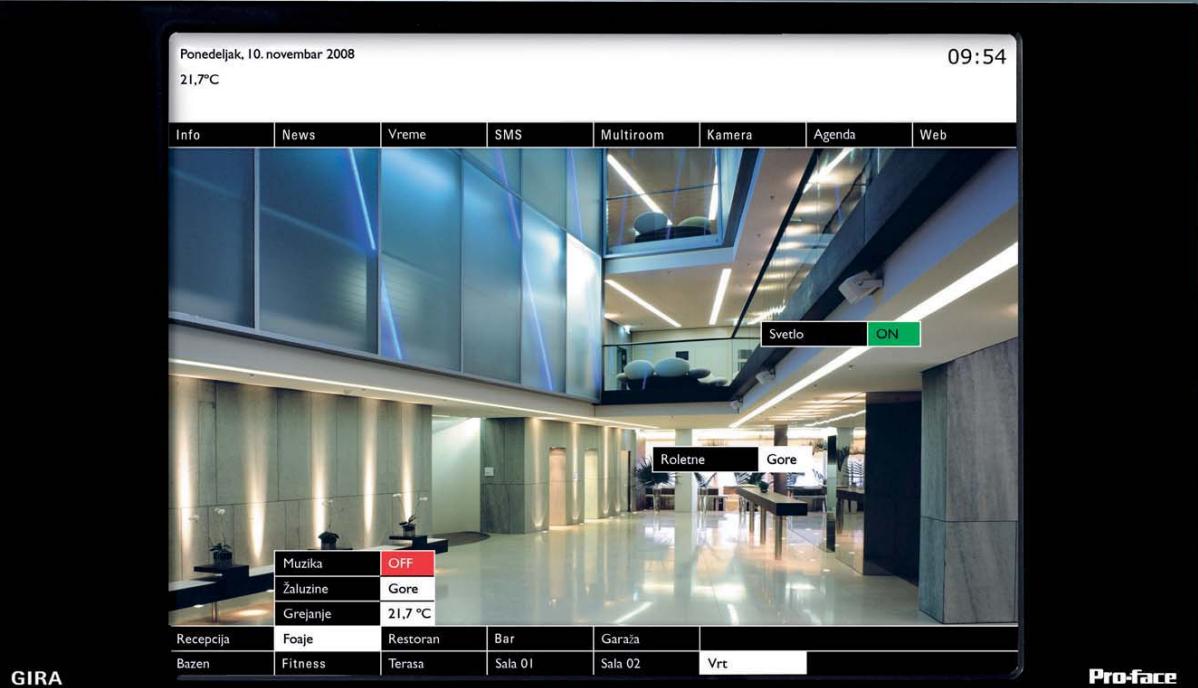

## facility management

## facility management

Primena EIB/KNX tehnologije u HOTELIMA ili POSLOVNIM OBJEKTIMA nezamjenjiv je partner u Vašem poslu. Uštede koje ostvarujete primenom FACILITY MANAGEMENTA prepovolit će Vaše troškove poslovanja. Konfiguracija sistema Vam omogućava 100%-postotnu kontrolu rada i potrošnje te ostvaruje sve željene usluge i pogodnosti prema Vašim klijentima.

The use of EIB/KNX technology in HOTELS or OFFICES is an irreplaceable partner in your business. The saving that you make by using the FACILITY MANAGEMENT will reduce your business costs by half. The system configuration enables 100% control of work and spending, and achieves all desired services and benefits towards your clients.

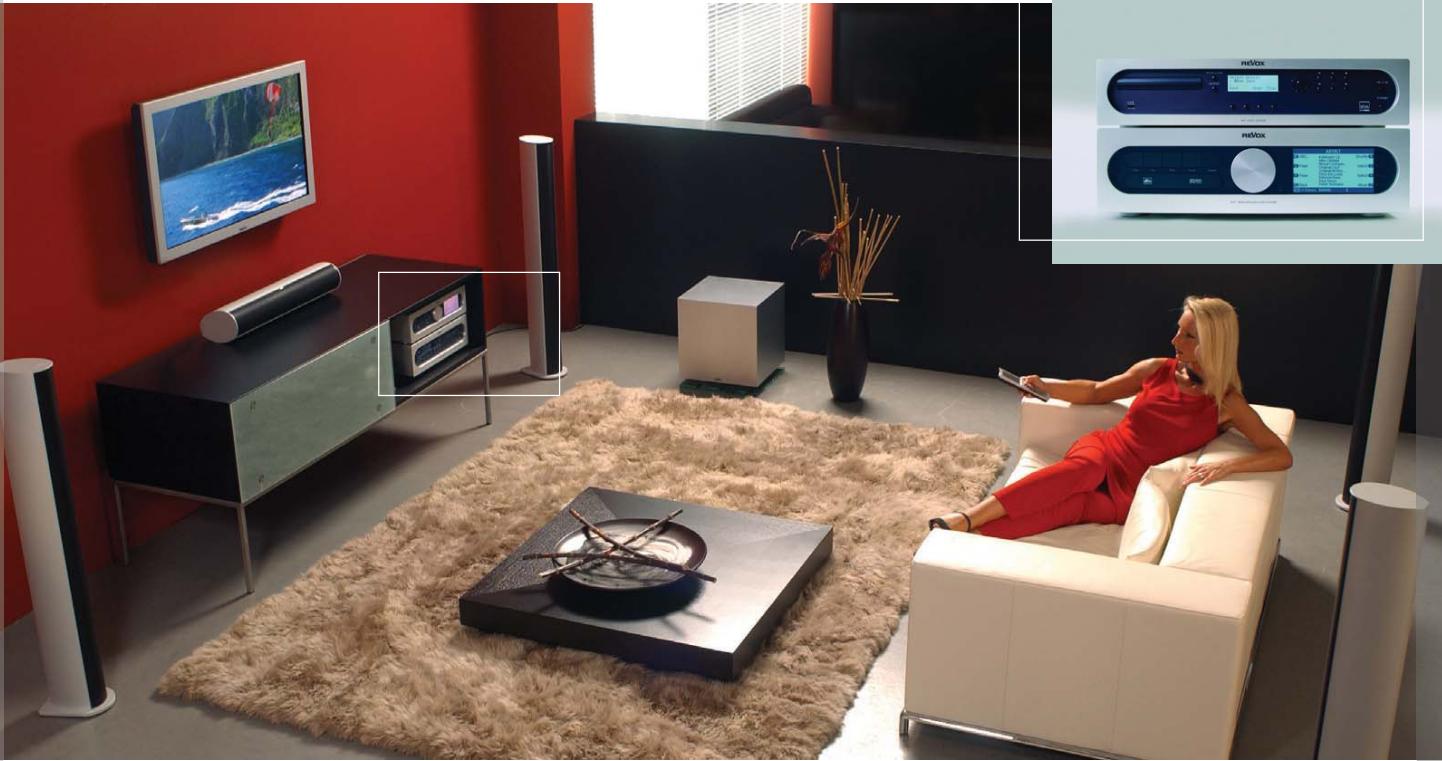

## multimedijalni sistemi

Multiroom sistemi Vam omogućavaju da jednostavnim pritiskom dugmeta na upravljaču kompletni audio-vizuelni doživljaj multimedije u Vašem domu pretvorite u veličanstveno iskustvo. Zahvaljujući svojoj modularnosti i kompatibilnosti, integracija s novim ili već postojećim sistemom (rasveta, sigurnosni sistem, multimedija, internet,...) pruža mogućnost da готово svi električni uređaji postanu lako upravljeni s bilo kojeg mesta u Vašem domu.

## multimedia systems

Multi room systems enable you, by a simple click on a remote control key, to transform a complete audio and visual sensation of multimedia in your home into a magnificent experience. Due to its modularity and compatibility, the integration with a new or existing system (light, security system, multimedia, Internet,...) provides an opportunity for almost all electronic devices to become easily controlled from any place in your home.

## asortiman

## product range

Novi razred višenamenskih touch screen kontrolnih daljinskih upravljača i mobilnih telefona danas predstavlja integrisano rešenje za upravljanje konvencionalnim kućnim bioskopom, multimedijskim sadržajima i osvetljenjem. zajedno u kombinaciji sa infracrvenom komunikacijom i pomoću WiFi bežičnog upravljača nudi jedinstveno upravljanje multi-room sistema.

A new class of multi task remote control and mobile phone today is an integrated solution for the management of conventional home cinema, multimedia content and lighting. Together in combination with infrared communication with Wi-Fi wireless control management offers a unique multi-room system.

# GIRA

## GIRA

Nudi široki assortiman proizvoda u svetu prepoznatljiv po visokom kvalitetu, jedinstvenom dizajnu te inovativnim mogućnostima. Jednostavnom ugradnjom i primenom istih možete uživati u svome domu više nego ikada, te ostvariti užitak u svakoj pojedinoj prostoriji Vaše kuće baš onako kako odgovara Vama. Sveobuhvatne funkcije video interfona, video nadzora i alarmnog sistema, rasvetnih uređaja, klimatizacije i ventilacije, kontrole roletni, žaluzina i/ili zastora prozora, zajedno s odabirom Vaše omiljene muzike i multimedijalnog doživljaja - sve to možete birati po Vašoj želji ili raspoloženju pritiskom na samo jedno dugme.

## GIRA

*offers a broad range of products which are globally recognized with regard to their quality, unique design and innovative possibilities. Due to their simple installation and use, you can enjoy your home more than ever and create in each room of your house an atmosphere that most agrees with you. Comprehensive functions of a video phone, video surveillance and the alarm system, lights, air conditioning and ventilation, the control of roller shutters, Venetian blinds and/or window shades, including the choice of your favorite music and of a multimedia experience - you can choose all that according to your wishes or your mood with only one click on one button.*

---

## PHILIPS PRONTO

Originalni Philips Pronto je kreirao novi razred višenamenskih touch screen kontrolnih daljinskih upravljača. Taj koncept danas predstavlja integrisano rešenje za upravljanje konvencionalnim kućnim bioskopom, multimedijskim sadržajima i osvetljenjem. Zajedno u kombinaciji sa infracrvenom komunikacijom i pomoću WiFi bežičnog upravljača Pronto vam nudi jedinstveno upravljanje multi-room sistema.

## PHILIPS PRONTO

*The original Philips Pronto singlehandedly created a new class of programmable touchscreen remote controls for intuitive operation. Today, the concept has evolved into an integrated control solution for conventional home theater, multimedia content and lighting. With a combination of infrared control\* and WiFi wireless control, Pronto provides true multi-room control.*

## REVOX

Više od 60 godina REVOX omogućava ljubiteljima dobrog zvuka nezaboravne trenutke. Sada REVOX donosi budućnost u Vaš dom. REVOX Multiroom sistemi Vam omogućavaju da jednostavnim pritiskom dugmeta na upravljaču kompletni audio vizuelni doživljaj multimedije u Vašem domu pretvorite u veličanstveno iskustvo. Zahvaljujući svojoj modularnosti i kompatibilnosti, integracija s novim, ili već postojećim sistemom (rasveta, sigurnosni sistem, multimedija, internet,...) pruža mogućnost da gotovo svi električni uređaji postanu lako upravljeni s bilo kojeg mesta u Vašem domu.

## REVOX

*For more than 60 years, REVOX ensures unforgettable moments to the admirers of a good sound. Now, REVOX brings future into your home. REVOX Multi room systems enable you, by a simple click on a remote control key, to transform a complete audio and visual sensation of multimedia in your home into a magnificent experience. Due to its modularity and compatibility, the integration with a new or existing system (light, security system, multimedia, Internet,...) provides an opportunity for almost all electronic devices to become easily controlled from any place in your home.*
